

Questions to think about

What **kinds of biases might be found** in the texts AIs were trained on? How might that affect their responses?

Should people who make AIs have to be able to **explain how they work**?

What could go wrong if you **asked an AI for advice** or used them as a source of information?

How do you think **AIs get information** about you? Do you think that's fair? Do you think it's accurate?

What kinds of **guardrails** should be required for AI developers? In which decisions should we need a **human in the loop**?
